

College Bound

DORM SHOPPING PROJECT

It's time to go shopping to purchase everything you'll need for your dorm room. So, what exactly will you need?

The supply list you will need to shop for is on Google Classroom. You will need to...

- Shop for everything on the list in the recommended quantities
- Include the store you purchased your items from along with the cost
- Picture your purchases by copying/pasting the items you've selected onto a Google Doc
- Provide a grand total for your purchases
- Submit your project via Google Classroom
- Complete the follow-up questions once you're submitted your project. Use additional paper if necessary.

Follow-up Dorm Shopping Questions

1. How much money did you spend for all of the listed supplies?
2. Describe and explain your reaction to the amount spent.
3. Identify any items that you use/need that weren't included on the list.
4. Go through your spreadsheet and highlight those items that you believe would be truly necessary.
5. Now compare your necessary list to an example of an actual college list (ask for this). How did it compare? Explain.
6. Recalculate the cost for only the highlighted items. How does only purchasing the necessities change your total?
7. List the items that you would not even consider taking to college with a brief explanation as to why.
8. Think of some ways you could save even more money on the items you absolutely had to purchase. Explain at least 5 ways.
