

# Handwashing using the WHO techniques

You have the opportunity to spread information to remind people to wash their hands properly during the Covid-19 pandemic.

Review the WHO technique and the video provided for washing hands properly:

- Recently I watched a YouTube video, [How to Wash Hands Properly](#), where someone donned a pair of rubber gloves, and put paint on their hands to simulate soap in order to demo how to correctly and thoroughly wash hands according to the 7 steps WHO technique of handwashing. The demonstration was pretty impressive!

Criteria:

- You may recreate the demonstration in your homes and either video record or take several photos of the demonstration to put into a Google Slide show, Animoto or Adobe Spark Video. You could try a new format: put their photos and instructions into a step by step order using [snap guide](#).
- If you have younger siblings, you could teach them how to properly wash their hands as well, documenting in the same ways mentioned above.

Rubric:

Criteria	10 pts. WOW!!!!!!	9 - 4 pts. It's good!!	2 pts. I did it!
The 7 steps of the WHO handwashing method is properly demonstrated			
The format for sharing is included in google classroom
