

Mangled Muffins

Read through the scenario and find the mistakes. List each mistake and then explain why it was wrong and/or explain what should have been done.

Jamie wants to make muffins. Jamie begins to measure the dry ingredients into a large mixing bowl and starts by packing the flour into the dry measuring cup. Because Jamie wants the muffins to be really sweet, the amount of sugar is doubled and the salt is omitted. Jamie is unable to find the baking powder so baking soda is substituted instead.

The liquid ingredients are next. The milk is measured in the same measuring cup as the flour and then poured directly into the dry ingredients. Next the oil is added and the eggs are cracked on the side of the mixing bowl.

Jamie uses an electric mixer to mix the batter until it is perfectly smooth. Because the non-stick spray is empty, Jamie just adds the batter to each muffin cup, filling each to the brim. Jamie turns the oven on, sets the timer and places the muffins in to bake.

Jamie has made 12 different mistakes! Can you find them?

MISTAKE	WHY IT WAS WRONG
