

Pregnancy Towers--Month by Month

You and your group will construct a pregnancy tower out of large index cards. Each index card will tell us about pregnancy and fetal development for a specific month. On each index card you will include the following information:

- Month #
- Size of baby
- What's happening developmentally with baby during this month
- What changes and discomforts is mom experiencing during this month
- Picture of baby during this month (hand generated or computer generated)

Resources

- My 9 Months App (March of Dimes)
- Hunterdon Healthcare Website
