Since my internet is about \$30/month, I have around \$20 dollars left for streaming services. Based on all of the information I have found I would choose to subscribe to Hulu. Hulu has a lot of the same shows as HBO Max that I want to watch and yet is \$2 cheaper each month. I would choose the ad-free version as I don't like having to watch ads on demand, and it is still in my budget. I also like that I can download episodes to watch on my phone or tablet if I am offline.

\$69.99/month

I would buy the Hulu, LiveTV, Disney+, ESPN+ bundle. It is \$69.99/month which is right at my budget. I would get the shows that I like from Hulu while also getting the movies and shows I like from Disney+. Also I would be able to watch live TV instead of just on-demand. I wouldn't be able to buy the ad-free version of Hulu, but I am willing to make that sacrifice.

 **YouTube Premium**

\$11.99/month

I would choose many different options with this budget. With my Wi-Fi, Hulu bundle, Netflix, Spotify premium, and Youtube premium I get all that I want. I get the shows and movies I like from Hulu without ads and Disney+. I also get the Netflix originals that I enjoy, like Young and Hungry and Stranger Things. With Spotify I get all the music that I like unlimited. I also watch a lot of YouTube, so having YouTube premium would allow me to watch ad-free and offline.
